

WHAT IS CLAIMED IS:

1. A light source structure, comprising:

a guidelight plate; and

a lighting unit including a lighting member and a plurality of lighting  
5 components respectively disposed on sides of the guidelight plate.

2. The light source structure as claimed in claim 1, wherein the lighting  
member is a CCFL.

3. The light source structure as claimed in claim 1, wherein the lighting  
components include a circuit board and a plurality of LEDs and resistors  
10 disposed thereon.

4. The light source structure as claimed in claim 1, wherein the guidelight plate  
is a flat, rectangular, and transparent plate.

5. The light source structure as claimed in claim 1, wherein the guidelight plate  
has two elongated sides opposite each other, and the lighting member and the  
15 lighting components are respectively disposed on the two elongated sides.

6. The light source structure as claimed in claim 1, wherein the lighting  
member is disposed on a side of the guidelight plate, and the lighting  
components are disposed respectively on two lateral sides of the guidelight  
plate, wherein the two lateral sides are perpendicular to the side.
